Here is the correspondence with the County Executive Officer, Alison Lehman that confirms fire mitigation activities fall under essential services, as well as construction workers. Land management and trail management practices like brush clearing, vegetation management, trail building etc would qualify as activities related to these respective areas.

Please advise.

Hi Erika,

These issues are being discussed and things are changing as we receive further direction from the State.

<https://covid19.ca.gov/stay-home-except-for-essential-needs/>

<https://covid19.ca.gov/img/EssentialCriticalInfrastructureWorkers.pdf>

Some good news - Our counsel shared updates on “essential employees”. It included “Fire Mitigation Activities” as part of “Law Enforcement, Public Safety and First Responders”

And “Construction Workers who support the construction, operation, inspection, and maintenance of construction sites and construction projects (including housing construction)” in community based gov-ops section

We will most definitely send you information as it becomes available.

Thank your you involvement. Your help in pushing out community information is greatly appreciative.

Alison

Hello team,

I'm writing to follow up regarding Friday's Task Force call and how best to receive updates regarding the definition of essential jobs as it relates to BYLT's role within the community as mentioned:

- Trail Maintenance for Vegetation Management and Wildfire Mitigation
- Land Management for the same
- The coordination and business of which is a valued community benefit

Additionally, it would seem that public access on trails and preserves does not violate the current State order, as long as guidelines are posted.

If these matters are best suited for follow up with the County Attorney, can you please connect me?

Thank you for your leadership. I realize this is an incredibly dynamic time.

My best,

Erika

Erika Seward
